- Developed a real-time parking application, providing real time navigation to the closest parking space available.

**Android Application – Campus Administration System**    **[Sept 2015-present]**

- Developed an Unified and secured administration system for college purposes, where any type of user such as student, professor, administrator, payroll or any other professional related to college can view and update information that is meant only for him/her, using Android SDK

**Conference web page**    **[Sept 2015-present]**

- Developed a Conference web-site, which hosts paper presentation and other events, using PHP and NodeJs.

**Front end development (HMTL/CSS/JS)**    **[Jan 2014-Aug 2015]**

- Tree-Grid Library :
  - Developed a table composite control, having an extra tree column, which is used to render data from multiple tables using Primary/Foreign relations, and tailored for Cordys BOP software.
- XForm Entity Integration :
  - Integrated XForm loading (.cafs) into Process Platform's Entity Model runtime using HTML5, Backbone.js, Underscore.js, Marionette.js and JQuery.

- **Pathfinder & Js Coverage :**
  - Developed Pathfinder, which derives a matrix of relations between source code and test cases. Pathfinder was developed using Cordys BOP itself and crawls on both Java and Javascript.

#### **Automation / selenium**

**[Jul 2009-Jan 2014]**

- Developed selenium Framework based on the complicated DOM structure of CORDYS BOP where testers can write test cases comfortably.

#### **SOA/ Cordys BOP/ Opentext Process platform**

**[Jul 2009-Jan 2014]**

- Addressed several enhancements and bugs in Workflow component, middle layered team in SOA which provides task communication with details to users groups such as developer, tester, manager and more or users in the form of INBOX similar to that of GMAIL's Inbox with lots of runtime functionalities.
